

Steve Glines
Painted Poets

ONE NICE THING ABOUT MODERN TECHNOLOGY is that there is a lot of it. If you can imagine it, there's an app for it. This is specially true for graphics processing. We showcase here a collection of poets processed through a host of different apps and Photoshop. Some images are processed through simple filters, some require a "brush" technique that effectively smudges the image with an electronic brush that makes it appear to be an oil painting. Still others "bleed" the image to appear like a watercolor.
